

SEMOPx Info – 17 October 2024

ETS available Historical Data to decrease from 14 to 7 days in SEMOPx Markets as of 13 November 2024 (First Trading date – Go-Live Date)

Important information – No Action required

- ETS available Historical Data to decrease from 14 to 7 days
- ETS Historical Data **go-live planned on 13 November 2024 (first Trading Date – Go-Live Date)**
- ETS maintenance planned on **12 November 2024 as of 22:30 CET until 02:30 CET.**

Dear SEMOPx Member,

Please be aware that as of the 13th of November 2024 (first trading date), the available historical data retention period in ETS will decrease from 14 to 7 days.

This change will allow the trading system to align with the foreseen amount of historical data days in MATS, the new Auction trading system that will go live in 2025.

After the go-live date, members will no longer be able to see their data older than 7 days in ETS for the following:

- **Orders**
- **Trades**
- **Market results**

Please note: this change applies for both ETS Client and API users. The M7 IDA Continuous reports are not affected by this change.

To access historical data files older than 7 days, please see the published reports on the SEMOPx Website ([link here](#)).

Please do not hesitate to contact us at info@semopx.com should you require any further information.

Kind regards,

SEMOPx Team
