- **ComTrader and API impacts :**

    o Failover improvement: historical data reduced to today + 4 days in the past (instead of 6)

- **M7 6.14 API Changes:**

    o New API schema 6.14

    o New attribute in Product Info Reports

Dear Member,

Please note that M7 Trading system will be under maintenance on 14/03/2023 from 18:40 to 21:45 GMT on SEMOpx market.

We kindly ask you to log out from ComTrader or your API before maintenance begins and to restart ComTrader or your API once it is finished.

You are required to download the mandatory version of ComTrader-6.14 and available here.

Beside the ComTrader version for Windows, dedicated ComTrader versions for MACOS and LINUX will be published soon on the portal and API users must check their application readiness and required changes ahead of release in ASIM.

Please note that the Advanced Simulation Environment urls are not affected by this change (urls already changed in February 2021) and can be accessed here.

Also be aware that no changes applied to any API documentation.

The full Technical Specification Release Note is available here.

Please do not hesitate to contact us at info@semopx.com should you require any further information.

Kind Regards,

SEMOpx
