Release Note

System concerned	M7 / ComTrader
Target go-live	29th June 2021

Content description

Upgrade from M7 6.10 to M7 6.11

Upgrade from ComTrader 6.10 to ComTrader 6.11

Deployment plan

Advanced Simulation deployment on 2nd June

Production Go Live 29th of June (subject to successful testing)

Impacts on SEMOpx & SEMOpx participants

- New M7 URLs in production - attached
- Password expiration activated
    - The user will be informed about the upcoming password expiration twice via e-mail (10 days before expiration / on the expiration day).
    - Impacts all users (Report / Trader / Back Office / API user / API Team User)
    - The user will be informed via e-mail 10 days before & at the expiration day
    - The password has to match LDAP criteria as mentioned in MFG110 – Trader manual ComTrader, page 17.
    - The password expiration period will start after deployment of the password policy and is effective immediately.
    - If a user is connected while the password expires the user won't be disconnected but it is not possible to login after the next logout.
    - Does not apply to Advanced Simulation
- New documentation: DFS140 – Orders
- API minor impacts and bug fixes
    - Regression test recommended
    - No new conformance test required
